2. Definitions

In addition to the definitions contained within Parks and Public Spaces By-law No. 2024-00XX, the following terms are defined for the purpose of this protocol:

- a) **"Emergency Shelter"** means a facility that provides temporary shelter for people experiencing homelessness, and may be operated by a private or public entity.

- d) **"Public Property"** means property owned by a government entity, and includes Municipal Property.

In addition, due to the presence of multiple overlapping uses and unique role as a community gathering space, the entirety of Conservation Park is deemed to be a Sensitive Use Area.

f) Service Agency means a publicly or privately funded organization operating within Greater Napanee which has a mandate that relates to homelessness or encampment response, and which is not under the control or direction of the Town. Service Agencies may be called upon by the Town to assist with this Encampment Response Protocol as community partners, but are not bound by it.

3. Context

Homelessness is a complex social issue that is often misunderstood. It can result from many compounding and/or individual factors such as a mental health, job loss, and domestic violence. Encampments are a visual representation of a lack of resources and policy failures. Addressing encampments, and the larger issue of homelessness, is a shared responsibility that requires all levels of government, community agencies, and stakeholders to work together to provide public, social, and health-related supports.

The Town's encampment response focuses on ensuring the safety of those living in encampments and on neighbouring properties; the ability for community residents to use and enjoy public spaces; and the collaboration of Community Partners and Service Agencies to provide essential support; and finding opportunities to build relationships based on trust and mutual understanding.

The Town recognizes that Section 7 of the Charter of Rights and Freedoms which provides that "Everyone has the right to life, liberty and security of the person and the right not to be deprived thereof except in accordance with the principles of fundamental justice." The Town further recognizes that these Section 7 rights extend to the right for unhoused individuals to shelter on public lands where no other accessible shelter option is available to them.

4. Principles and Commitment

In all interactions with people who are living unsheltered, staff will engage in utilizing a humancentered, health-focused, rights-based approach. All actions will be guided by a commitment to upholding the human rights and human dignity of all individuals living in encampments, temporary shelters, or tents. Staff will also work to build rapport through mutual respect, effective communication, and empathy, and by maintaining transparency around the expectations of individuals living in encampments, temporary shelters or tents, and Town staff.

5. Responsibilities

The Town does not have any authority to direct Police or Social Service Agencies, but is committed to working in partnership with these organizations to provide a coordinated and holistic approach to encampments. The Town will be responsible for responding to encampments located on Municipal Property within the limits of its services and authority.

6. Guidelines Respecting Encampments on Public Property

When the Town, in consultation with local Service Agencies, has reasonable grounds to believe that the number of locally available and accessible shelter beds is less then that number of individuals in need of shelter, then a temporary suspension of the Town's By-law section prohibiting camping on public lands shall be permitted subject to the requirements laid out in this section.

<u>Prohibited Areas for Erecting Encampments, Temporary Shelters, or Tents</u> Individuals experiencing homelessness can set up encampments by erecting temporary shelters for themselves and grouping together with others in similar circumstances. However, each encampment or cluster of shelters must not exceed three tents or similar structures, and there must be a minimum separation of 50 meters between each encampment or cluster. Additionally, the location of encampments must carefully balance public and private interests, and therefore encampments will not be permitted within a Sensitive Use Area.

Further, no temporary shelter or tent will be permitted to be attached or tied to any building or permanent structure, but must be freestanding.

Maximum Personal Space Allotment

The total area for a single tent and all its associated belongings cannot exceed a 3-metre by-3-metre area, or 9-metres squared, and the total area for three tents within a cluster cannot exceed beyond a total area of 27-metres-squared.

Individuals are required to keep all belongings inside their tent or structure. According to the Property Standards By-Law, all property must be maintained and kept clean at all times.

7. Encampment Response Process

Given that several circumstances require unique responses, the following guidelines have been established to direct responses to people living in encampments, and their temporary shelters, or tents:

- 1. When an encampment, temporary shelter, or tent is located on public property, and <u>within a prohibited area</u> or Sensitive Use Area, as defined by this Protocol:
 - a) Town staff will notify Service Agencies and request them to engage with the individual(s) living within an encampment, temporary shelter, or tent to better understand their needs and connect them with internal and community supports, including housing-focused case management; referral into the emergency shelter system; referrals to health agencies, social assistance supports, and specialized outreach supports; and any other relevant supports available that would improve an individual's health and well-being.
 - b) Officers will visit the site and confirm whether the encampment, temporary shelter, or tent is within a prohibited area. Officers will notify the individual(s) living at the location via Notice of Trespass and verbally, if possible, that they are in a prohibited area, and that they will be required to move from the existing location.
 - c) If the duration of time provided by a Trespass Notice expires an individual(s) at the site has not moved voluntarily and is unwilling to move Town Staff will notify Ontario Provincial Police. Ontario Provincial Police will be requested to support the Town Staff in directing the individual(s) living at the encampment, temporary shelter, or tent to vacate the prohibited area.
- 2. When an encampment, temporary shelter, or tent is located on public property, and <u>not</u> <u>within a prohibited area</u> or Sensitive Use Area, as defined by this Protocol:
 - a) Town staff will notify Service Agencies and request them to engage with the individual(s) living within an encampment, temporary shelter, or tent to better understand their needs and connect them with internal and community supports, including housing-focused case management; referral into the emergency shelter system; referrals to health agencies, social assistance supports, and specialized outreach supports; and any other relevant supports available that would improve an individual's health and well-being.
 - b) Officers will visit the site and confirm whether the encampment, temporary shelter, or tent is not within a prohibited area.
 - c) If there are few or no immediate health, safety, or other concerns due to the encampment or its location, Officers will monitor the area and engage with Service Agencies to determine the next steps.

8. Encampments on Private Property

Encampments, temporary shelters, or tents identified on private property are primarily the responsibility of the property owner. Where the owner has not provided consent, concerns of the owner are within Ontario Provincial Police jurisdiction and will be subject to ordinary enforcement procedures in accordance with applicable laws.

Ontario Provincial Police may seek the assistance of Municipal Staff as appropriate or required in the circumstances.

9. Process for Designating an Encampment or Temporary Shelter as Abandoned

While the Town is aware of many encampments, temporary shelters, and tents in the community, people living in encampments, temporary shelters, and tents may move to new locations and/or abandon a previous site without knowledge. Given that maintaining one's possessions while experiencing homelessness is vital to a human-rights-based approach, staff will be cautious when deeming a site to be abandoned.

The following process will be followed regarding potentially abandoned sites on public property:

- 1. If Town Staff have not witnessed anyone at the site and/or can confirm that the former inhabitants of the site have moved elsewhere, they will place a notice at the site informing potential residents that the site is to be cleaned in two (2) business days from the time the notice is placed.
- 2. Within the two-day timeline, all reasonable attempts will be made by Town Staff, in coordination with Service Agencies, to ensure that individuals known to be previously staying at a site have been made aware that their former site will be deemed abandoned and cleaned.
- 3. Town Staff will coordinate the clean-up, to be completed either by parks staff, public works staff, or a contractor, within 72 hours of approval, with discretion for extenuating circumstances such as inclement weather.
- 4. Wherever possible, Town Staff will coordinate with Service Agencies to store personal belongings left at a potentially abandoned site prior to clean-up.
- 5. Where the conditions of the site pose an imminent risk to public health and safety, these timelines may be shortened. In all cases, Town Staff will make every reasonable effort to provide advance notice to former inhabitants prior to commencing clean-up work.

Clean-up and maintenance of encampments, temporary shelters, or tents previously on private property are the responsibility of the property owner.

10. Sanitation and Waste Removal

Encampments are a temporary solution to a complex social need, and are not intended to become a permanent housing solution. At least twice per year, Town Staff will conduct a site clean up of every encampment on public property to remove waste and debris. This work shall be done in the interest of public safety and sanitation. During the work, site occupants may be required to temporarily relocate to a different area. Town Staff will ensure advance notice is provided to site occupants and service agencies a minimum of one week prior to the work being scheduled.

11. Open Air Burning

When this protocol is in effect, the Fire Chief or designate shall have the discretion to manage the Town's Open Air Burning By-law in accordance with the following principles:

- 1. Individuals living in encampments may be permitted to have small, contained, safe and supervised fires for the purposes of cooking, recognizing that such fires may help promote life, health and safety for the unhoused individual.
- 2. If a Firefighter is called to respond to a report of open air burning at an encampment, the attending Firefighter may direct that the fire be extinguished in accordance with Section 28 of Open Air Burning By-law No. 2019-0021, may direct that the fire be modified in order to improve safety, or may direct that the fire be permitted to continue subject to the requirements of the preceding section 11.1.
- 3. When determining whether the fire should be extinguished, modified, or permitted, the attending Firefighter shall consider mitigating factors such as:
 - a) The current and forecasted outside temperature;
 - b) The size of the fire;
 - c) How the fire is contained;
 - d) How the fire is supervised;
 - e) The materials being burned; and
 - f) Proximity of the fire to tents, buildings, property lines, overhead wiring, trees and brush, and other combustible materials.
- 4. When a Total or Partial Burn Ban has been declared by the Fire Chief under the authority of the Open Air Burning By-law, all fires shall be strictly prohibited within encampments with the exception of cooking devices approved as safe for use by the Fire Chief or designate.

12. Safety

Conditions in encampments may create significant health and safety concerns for those living outside including open flames, cold weather, and lack of access to water and sanitation. Serious health, safety, or criminal activity may warrant immediate removal of an encampment. Combustible materials in encampment sites could present a health and safety concern for encampment residents and/or the general public.

Nothing in this protocol purports in any way to limit or fetter the responsibilities, discretion, duties or powers of the Fire Chief, Medical Officer of Health, Chief of Police or any other statutory or other office or power holder in relation to anything that may fall within their respective purview or jurisdiction, including the enforcement of any law.
